

SPORT HORSE MIX

Sport Horse Mix is a palatable combination of long chop alfalfa with cereals, high fibre pellets and Soya oil. Providing a moderate energy, high oil complete feed.

Sport Horse Mix is suitable for all Horses & ponies in regular work especially those competing on a regular basis at **Polo, Eventing, showjumping, Driving, Endurance, Dressage** or any other demanding discipline. It provides a moderate level of energy per kilogram (12.4MJ/kg) and should be fed to maintain an appropriate body condition.

Sport Horse Mix provides energy from a balance of different sources including starch from cereals, oils and fibre. The high oil content (8.5%) provides an excellent source of slow release energy and will also help maintain good coat and skin condition.

Sport Horse Mix provides important digestible fibre through the inclusion of high fibre pellets and alfalfa. The increased inclusion of chopped alfalfa will promote natural feeding behaviour, stimulate chewing and also the production of saliva to help buffer stomach acidity.

Sport Horse Mix is a balanced feed and provides a full range of vitamins and minerals to maintain health and vitality and also to support muscle function during exercise.

Protein	Oil	Fibre	Ash
12.5%	8.5%	8%	7%
